

CAMPBELL - BROWN ECOLOGICAL RESERVE
RESERVE No. 77

1990 Addendum

In returning determinations of spiders collected during the 1989 survey, Dr. Dondale of Biosystematic Research Centre, Ottawa, asked for additional specimens to be sought from the talus slope area in the hope of clarifying one particularly difficult item. This was done in June 1990 and from the group submitted several additional species were identified which should be added to the previous year's list. These are -

Theridionidae

Thymoites camano Levi

Linyphiidae

Arcuphantes sylvaticus Chamb. & Ivie ?

Lepthyphants complicatus (Em)

Lycosidae

Pardosa xerampelina Keys.

Clubionidae

Castianeira sp. (juv.)
