

A CONSERVATION REVIEW OF THE ELPHINSTONE PROVINCIAL PARK EXPANSION PROPOSAL

Elphinstone Logging Focus (ELF) invites you to a public meeting to learn why we have a once in a lifetime opportunity to protect this unique ecosystem.

Wednesday, June 10th at 7:30pm
Roberts Creek Community Hall

A scientific review by McCrory Wildlife Services has been completed documenting the ecological features of the Elphinstone Forest zone.

The author, Wayne McCrory (RPBio) is one of Canada's senior conservation-biologists, and is well-known for his grizzly bear habitat work on B.C.'s North Coast that led to the protection of the world's first grizzly bear sanctuary. He has 40 years of professional experience in ecosystem based land use planning.

McCrory has conducted field studies and compiled existing data into a break-through report on our Elphinstone inter-urban forests. He will make a compelling case for protection of a 2,000Ha area in this public forum.
